Subject: Macadamia Nuts

Today's subject of this email refers to the academic & business rivals of Microsoft Corporation who will take the lead in the nine state holdout of the US v Microsoft settlement. The nine attorney generals and their legal teams have challenges with the extrapolation of (for those who just don't 'get it').

In other related news, local electricians turn off the "W" on the Wells Fargo Bank - Irvine sign overlooking the I-405 freeway near MacArthur Avenue and John Wayne Airport as a communication that Larry Ellison, CEO of Oracle Company, is a major player at the Bank. The 'Ells Fargo Bank' beams this 'coded' message almost every other day to all who enter the 24 Fitness Sporting Club as well as the thousands of commuters and travelers near the Lakeshore Tower corporate campus across freeway I-405 in Irvine. Apple Computer & Sun Microsystems will continue to distract Microsoft's lead negotiators, forming the alliance with Oracle Corporation to lobby the remaining nine states from a 2001 Holiday settlement, instead focusing on March 2002 for the next phase of the US v Microsoft trial.

Today's LA Times hints at ID fraud in the NY based 'Attack on America. This fraud has been one of the main reasons that my settlement has yet to occur. Local family as well as conspiring US & state government officials have stalled any just settlements through illegal payoffs, overseas money transfers, as well as international subversion. Most of the illegal efforts have been from 'legitimate' foreign and US sources, that 'apologize' when errors occur, yet do nothing for damages caused or delays in my business future. Recent business stalling at the Garden Grove, CA, Crystal Cathedral by local Orange County businesspeople, including billionaire Donald Bren of the Irvine Company have involved Major League Baseball contraction talks and purchase proposals of the Anaheim Angels and NHL Mighty Ducks Hockey Team at the Arrowhead Pond.

This week's MLB discussions have tabled the baseball contraction talks for a year, placing the sale of the Angels, Marlins, Twins & Expos on hold while the players conspire for future business. Face it folks, not even new stadiums from the past ten years is going to keep baseball from expanding inside or outside of the United States! Baseball is too slow for most people, and the US Anti-Trust exemption may end as baseball acknowledges over \$500 million dollars in losses, and only 5 teams profitable! The United States is a free market society, and the public wants NFL football, NBA basketball, as well as extreme outdoor and indoor sports now! Even two professional wrestling organizations had to merge in order to remain competitive in the world of television sports.
